As the heat bears down on us, so does the need to expose our toes to sunlight. Sandals are a summer must, and this year is no exception. However, before you start taking out the flip flops, consider getting yourself a pair of sandal wedges.

These are not only the latest trend, but can quickly stylize any look (as well as make legs look longer - 🍷)

For those who fret about the practicality of a wedge, worry not. There are plenty of sandal wedges made out of light material such as cork, which make these shoes not only stylish but comfortable.
